

**CABLE BEACH**  
 One of the most beautiful stretches of beach in the world. Cable Beach takes its name from the cable which linked Broome with what is present day Indonesia. Stingers may be present during the months from November to May. Always check by asking the Broome Visitor Centre before swimming.

**BROOME PEARLING HISTORY**  
 Broome owes its early beginnings to the discovery in 1861 of the giant pearl oyster Pinctada Maxima which led to the establishment of Broome's pearling industry.

**BROOME VISITOR CENTRE**  
 1 Hamersley Street, Broome  
 (first roundabout as you enter town)  
 T: +61 8 9195 2200  
 E: enquiries@visitbroome.com.au  
 W: visitbroome.com.au

**DINOSAUR FOOTPRINTS**  
 Believed to be those of a carnivorous species that lived 120 million years ago, the tracks are embedded in sandstone at the base of the cliff and can only be seen at low tides of 2.16m for one set of prints and 1.46m or lower for three sets of prints. PLEASE TAKE CARE AS YOU DO NEED TO CLIMB DOWN THE CLIFF FACE TO VIEW THE FOOTPRINTS.

**STAIRCASE TO THE MOON**  
 A natural phenomenon caused by the full moon reflecting on the mudflats of Roebuck Bay at low tide.

**REDELL BEACH**  
 A spectacular stretch of beach named after Captain Reddell who was murdered by his crew in 1899.
