# The majestic Humpback whales

Broome is one of the greatest places on Earth to watch the majestic Humpback whale. The Kimberley is a world class whale watching region and home to the world's largest population of Humpback whales (with numbers nearing 35,000). Often travelling in pods, these amazing creatures can be up to 16 metres long and weigh up to 45 tonnes. They migrate north along the WA coast, aiming for the warm waters of the Kimberley to calf. A Humpback whale breaching or tail slapping has to be close to the top of any list when it comes to 'must do' wildlife experiences. Our local tourism operators are ready to help you relax, enjoy and discover what whale watching in Broome is all about. Read on to learn about tour options this season.

**WHALE WATCHING IS USUALLY AVAILABLE FROM JULY TO SEPTEMBER**
